## ABOUT IJCIT

The International Journal of Computer and Information Technology (IJCIT) only publishes articles of the highest quality. IJCIT is a scholarly, peer-reviewed journal that provides a forum to the academics, scholars and advanced level students for exchanging significant information and productive ideas associated with all IT disciplines.

**ISSN** 2078-5828 (Print), 2218-5224 (Online)

## MAJOR AREAS OF IJCIT

Algorithms  
Artificial Intelligence  
Bio-informatics  
Bengali Language Processing  
Circuits and Systems  
Computer Vision  
Computer Graphics and Multimedia  
Computer Based Education  
Computer Networks  
Data Communication

# Call for Papers

**Aim and Scope**—International Journal of Computer and Information Technology (IJCIT) is publishing high-quality papers on the state-of-the-art of Computer Science and Information Technology. Theoretical research contributions presenting new techniques, concepts, or analyses, reports on experiences and experiments of implementation and application of theories, and tutorials on new technologies and trends are welcome.

**Instructions**—These instructions give you guidelines for preparing papers for IJCIT Transactions. **Please use IJCIT template for the transactions.** IJCIT template can be downloaded at [www.uap-bd.edu/ijcit.html](http://www.uap-bd.edu/ijcit.html). Please note that use of IJCIT template is meant to assist authors in correctly formatting manuscripts for final submission and does not guarantee how the final paper will be formatted by IJCIT staff. An abstract should be 100 to 200 words for regular papers, no more than 50 words for correspondence (short) papers and comments, and should clearly state the nature and significance of the paper. Abstracts *must not* include mathematical expressions or bibliographic references.

When you open the IJCIT template, select “Page Layout” from the “View” menu in the menu bar (View | Page Layout), which allows you to see the footnotes. Then type over sections of the document or cut and paste from another document and then use markup styles. Please keep the template at 8.5” x 11”—**do not set the template for A4 paper.** The pull-down style menu is at the left of the Formatting Toolbar at the top of your Word window (for example, the style at this point in the document is “Text”). Highlight a section that you want to designate with a certain style then select the appropriate name on the style menu. The style will adjust your fonts and line spacing. Use italics for emphasis; do not underline. **Do not change the font sizes or line spacing to squeeze more text into a limited number of pages. Please be certain to follow all submission guidelines when formatting an article or it will be returned for reformatting.**

**Copyright Form**—IJCIT copyright form must accompany your final submission. Authors are responsible for obtaining any security clearances.

**Helpful Hints**—IJCIT staff will do the final formatting of your paper, some figures may have to be moved from where they appeared in the original submission. Figures and tables should be sized as they are to appear in print. Figures or tables not correctly sized will be returned to the author for reformatting. We strongly encourage authors to carefully review the material posted here to avoid problems with incorrect files or poorly formatted graphics. We also strongly encourage authors to carefully review the material posted here to avoid problems with incorrect files or poorly formatted graphics.

Place figure captions below the figures; place table titles above the tables. If your figure has two parts, include the labels “(a)” and “(b)” as part of the artwork. Please verify that the figures and tables you mention in the text actually exist. Figures and tables should be called out in the order they are to appear in the paper. For example, avoid referring to figure “8” in the first paragraph of the article unless figure 8 will again be referred to after the reference to figure 7. **Please do not include figure captions as part of the figure. Do not put captions in “text boxes” linked to the figures. Do not put borders around the outside of your figures. Please use the abbreviation “Fig.” even at the beginning of a sentence. Do not abbreviate “Table.” Tables are numbered numerically.**

Figures may only appear in color for certain journals. Please verify with IJCIT that the journal you are submitting to, accepts color before submitting final materials. **Do not use color unless it is necessary for the proper interpretation of your figures.**

All figures will be processed as images. You will have the greatest control over the appearance of your figures if you are able to prepare electronic image files. Save them to a file in PostScript (PS) or Encapsulated PostScript (EPS) formats. Use a separate file for each image. File names should be of the form “fig1.ps” or “fig2.eps.”

**Final Stage**—For papers accepted for publication, it is essential that the manuscript and artwork match the hardcopy exactly! The quality and accuracy of the content of the material submitted is crucial since the content is not recreated, but rather converted into the final published version.

**Paper Submissions**—**Please send the manuscript by email to [ijcit@uap-bd.edu](mailto:ijcit@uap-bd.edu).** All submission must be made in DOC format. Further information is available at [www.uap-bd.edu/ijcit.html](http://www.uap-bd.edu/ijcit.html). Papers that have been published or submitted to the other journals or books will not be considered for publication. Revised or extended versions of papers may be submitted. Papers should be submitted in English and concisely written.
